NEW ROAD COLLECTION.

THE RIGHT DIRECTION.

NOBILIS[®]
The Best Technology for Water

NOBILI ECOFRESH

Temperature limiter. Possibility to set the maximum water temperature.

NOBILI WATERSAVING

Dynamic flow regulator. The lever elevation is blocked halfway so the water consumption decreases of 50%.

NOBILI ENERGYSAVING

Energy limiter. Water supply starts at cold temperature with the handle in centric position.

NOBILI ECOPLASTIC

Cartridge Nobili Widd® made in non-toxic plastic.

NOBILI LIVEDRIVE

Clutch system for the ceramic disks at low-friction. Smooth and fluid movements of the handle are assured.

NEOPERL® CASCADE®

Two aerators are provided in the box (versions: open and 5 l/min).

NOBILI ECOBRASS

Brass with a minimum percentage of lead.

NOBILI BRIGHTING

Extremely bright and shiny chrome finish.

PARIGI® PARINOX® SOFTPEX®

Highly resistant hoses with superior inner hygienic properties.

ENERGY EFFICIENCY CLASS

- NOBILI WATERSAVING
Dynamic flow regulator
- NOBILI ECOFRESH
Customizable temperature limiter
- NOBILI LIVEDRIVE
Low-friction movement of the ceramic discs
- NOBILI ECOPLASTIC
With use of alimentary plastic

The full immersion cartridge Nobili Widd® - Water Immersion Dry Disc - 35 Eco (RDE00118/1 CR basin mixer, RDE00128/2 CR CR tall-body basin mixer and RDE00119/1 CR bidet mixer are provided with it) allows the water, while the lever is in centric position, be supplied at cold temperature and avoids inadvertent ignitions of the boiler (Nobili EnergySaving). The entire collection is equipped with the latest eco-friendly Nobili technology: Nobili WaterSaving (dynamic flow regulator, able of braking the vertical movement of the lever

when half the flow-rate is reached, halving the water consumption), Nobili EcoFresh (temperature limiter), Nobili EcoPlastic (exclusive use of non-toxic materials). The innovative concept of Widd® cartridge (the water flows outside the cartridge's profile so the mechanical wear is reduced, the fats are not removed and the lubrication of the disks remains unchanged), in addition to Nobili LiveDrive, the clutch low-friction system of the ceramic discs, guarantee extraordinary soft motions during the entire life of the mixer.

The consumption of the mixer is greatly reduced thanks to the combination of Nobili EnergySaving and Nobili WaterSaving technologies: this turns into an annual savings up to 200 €. The value, calculated on the basis of the average cost of water and gas in Italy, refers to a household with 4 people using the same mixer (10 openings per person, daily, for 1 minute time).

Nobili EnergySaving technology wipes out the carbon dioxide emissions caused by the involuntary ignition of the boiler. This means that for every single basin mixer, 85 kg of CO₂/year are not issued (as reported, in an household with 4 persons, based on 10 openings, in one day, per person). Comparing this value to the average emissions of cars, we can say that the saving obtained from 1.000 mixers is equivalent to 56 cars for 10.000 km a year/each.

Images, technical data and characteristics of the models shown in this catalogue may be subject to changes, in detail or substantial, without prior notice, for the only purpose of improving the product. Catalogues are conceived and printed before the effective distribution of the products, it is therefore not always possible to provide detailed descriptions of every specific particular. We recommend to always check the technical features before finalising the purchase, especially if the choice significantly depends on a technical characteristic shown here.
